

Department of Environment and Natural Resources

of some kind can be found in every state. Our website is www.ncdenr.gov, for instance.

The communities around I-77 and I-40 found this department and its records particularly helpful. Acquaintance with the department's duties is especially important; if for no other reason, than to report an infraction to the correct place.

Every department is dependent on citizens to report errors they see in the environment.

We would like to hear from you, too, which can be done at SUBMIT, www.iredell.org.
